

# Multipath **iP**

Intelligent Alarm Transmission Systems

**The NBN ready Transmission Solution from Inner Range**  
Your simple cost effective solution for IP alarm transmission

## E-link

**PCB only version**

Fit it into the enclosure of your choice, or fit it inside your existing alarm panel enclosure

**Control your security system with the SkyCommand Smart phone App**

for more information visit <http://skycommand.innerrange.com>

Battery Charger On-board | Dialler Capture On-board | Full support for IRfast  
Remote Auxiliary Control | Zone inputs on-board TTL & RS232 | Securitel Interface  
16Vac or 12Vdc Supply | High Level Interfacing to Concept with remote arming | 2 Auxiliary output relays on-board | Small form factor

# E-link

The Multipath-IP E-Link STU is a cost effective field device used to connect any ContactID dialler or Securitel equipped alarm panel to the Multipath-IP network.

The E-Link STU has Ethernet alarm transmission capability and Securitel RS232/TTL Interfaces, allowing simple connection to the Securitel interface on many brands of alarm panels.

## Features:

Fast polling – Configurable Bi-directional polling from 10 seconds to 80 seconds to meet the requirements of AS2201.5

- Ethernet Port for high-speed polling and encrypted Internet alarm transmissions
- Secure data transmission with 128 bit AES encryption
- Dialler Capture port to receive communications from any alarm panel equipped with a dialler and programmed to report ContactID
- RS-232 and TTL Serial Securitel Interfaces for “Panel to STU” connections
- App that allows the end user to control the alarm panel i.e. arm/disarm, aux control and automation

*\*Available on Google Play, IOS store and web- <http://skycommand.innerrange.com>*

- High Level Serial Interface for Inner Range Concept Panels
- Auxiliary output for critical path fail warnings
- Relay outputs for control of external devices
- Watchdog Pulsed Zone Input
- Dedicated Cabinet Tamper Input
- 2 General Zone Inputs with EOL resistors
- 16VAC with On-board Battery Charger or 12VDC Powered

## Installation Options:

- Available in a Sturdy 260x255x85mm Metal Enclosure
- Optional GPRS modem kit for upgrading E-Link to Omni-Link after purchase (if multiple paths required)

*Please see Omni-Link STU brochure for more information if GPRS and Ethernet is required at purchase)*

- A FE3000 & MPIP Programming lead (993039) will be needed for Ethernet configuration

## SPECIFICATIONS

### Physical

PCB Dimensions:	210mm(L) x 95mm(W) x 50mm(H)
Installation Environment:	0° -50°C @ 15% to 85% Relative humidity (non-condensing)

### Electrical

Power Source:	16V 1.5Amps AC or 12V DC
Total available current:	700mA @ 12 Volts (Battery charging plus Ancillary load)
Max. Battery current:	500mA continuous
Max. Ancillary current:	200mA continuous (100mA per open collector Auxiliary)
Recommended battery:	12 Volt SLA (gel) type, 7 Amp-Hour.
Typical Backup time:	Up to 11hours (7 Amp-Hour battery)
Minimum operating voltage:	10.5 Volts
Low battery sense voltage:	(typical): 11.5 Volts
Battery fuse:	2 Amps
Supply currents @ 12volts:	140mA (idle)+ 90mA/160mA (PANEL on line/PANEL Linked) +200mA to 600mA (GSM on line)

### Inputs

Zone inputs:	4 General Purpose Zone Inputs: Zone 1 default is PABX monitoring Zone 2 default is general purpose use Zone 3 default is Panel Watchdog Input Zone 4 default is Cabinet Tamper Input <i>All zones can be configured to use EOL resistors or Open/Close contacts All zones must be connected to dry contacts</i>
--------------	--

### Outputs

Relay Auxiliary outputs:	Aux1 & Aux2 2A –30VDC Fail auxiliary output (LA): ‘LA’ Terminal -open collector (fail = open circuit) Test auxiliary output (PT): ‘PT’ Terminal -open collector (test = open circuit)
Indicator lamps:	9
Alarm format:	Contact ID or IRfast
PSTN isolation voltage:	2500 V RMS
PSTN Earthing:	Yes, through AC plug-pack.
Max PABX Line voltage:	35 Volts
Max PABX current:	35 mA
PABX Output Level:	-15dBm

## Ordering Options

PCB Only & Accessory Kit

FE3000 & MPIP Programming Lead

2G & 3G Modem Upgrade Kit

## Part Numbers

998325-PK

993039

### 2G Part Number

998302T#

998302TO

### 3G Part Number

998303T#

998303TO

Telstra Primary / Optus Backup
