## Features

- Integrated access control
- Easy to read code pad
- Easy text menu control
- AWAY & STAY arming modes
- 128 users
- Partitioning to 8 separate areas
- System indicators - AC fail system troubles
- Chime feature on user selectable zones
- Remote arming via the telephone
- Walk test mode
- Alarm memory recall
- Code pad panic and duress
- 2 entry timers
- Remote expansion

## Tradition of Quality and Innovation

For over 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems proudly offers a wide range of intrusion, access control, CCTV, management and communication systems and components to help you find the solution for any application. We are the global supplier of choice for innovative technology backed by the highest level of service and support. When you need solutions you can rely on, choose Bosch.

## Compatible Accessories

ISC-PDL1-W18G - Tritech® PIR / Microwave Detector. Sensor data fusion & tri-focus optics technology, with microwave anti-masking. 18m x 25m coverage, field selectable to 7.5m x 10m. Easily adaptable to fit any commercial application.

ISC-PPR1-W16 - Quad PIR Detector. Sensor data fusion & tri-focus optics technology. 16m x 21m coverage, field selectable to 7.5 m x 10m.

ISM-BLQ1 - Quad PIR Detector. You get two PIR detectors in one unit. For an alarm to be activated, both PIRs must signal an alarm. Regular motion in one part of the room would cause a standard, single PIR detector to alarm repeatedly, using a quad will give you the reliability you need.

ISM-BLD1-P - TriTech® PIR/Microwave Detector. This model combines standard PIR technology with microwave detection technology and advanced signal processing, which provides the best analysis of disturbances. TriTechs also offer pet/animal immunity up to 45kgs, making it the ultimate in motion detection for your business or home.

DS860 - Tritech® Dual Microwave / PIR with 18m x 18m coverage. Excellent catch performance with freedom from false alarms.

DS308EA - Anti-Masking capability to detect objects placed over the cover or spray detected on the lens. Quad PIR with temperature compensation means fewer false alarms. 15m x 15m coverage.

DS938Z PIR & DS9360 TriTech® - 360˚ ceiling mount. Its 18m diameter coverage, with motion monitor included, verifies that a clear view of your protected area is guaranteed all the time.

DS9370 TriTech® - with 21m diameter coverage, can be mounted as high as 7.6m and has 3 unique pattern groups that are adjustable for optimum performance.
DS720i TriTech® - Dual PIR / microwave detector with optional long range lenses. Choices of 91m x 4.6m, 37m x 8m or 21m x 27m coverage patterns. Ideal for warehouses, even with narrow racking.

CP100 - Slim Line Text Code Pad for system interaction.

# Solution 64
## The Perfect Security Fit for your business

**BOSCH**
Invented for life

# Simply Elegant
## Solution 64 is the perfect fit for all your business needs

**You have a responsibility to your staff and your business to protect them. Should a burglary or other incident occur, the loss is not just the items destroyed or stolen, it is the loss of comfort and security that your workplace once provided. The Solution 64 from Bosch Security Systems provides you with an elegant solution that will fit your business perfectly. This integrated security and access control system combines an impressive array of functions with future focused technology and the ability to adapt to your changing needs and work environment. Finding the right security system for your business need not be a complex and time consuming task.**

### The Perfect Fit

Every business is different, and the Solution 64 can adapt to any requirements. It is capable of providing simple cost effective solutions for a small business, yet is complex enough and fully expandable up to 64 zones for large applications. The Solution 64 has the ability to be expanded up to 128 users as your business grows, providing a perfect fit today, tomorrow, and in the future. With programmable authority levels, you determine which functions each staff member can perform such as turning the system on and off, and accessing restricted areas. Customised security has never been so simple.

# Superior Performance
## Flexibility at your fingertips

### 24 Hour Protection

The Solution 64's chime mode allows you to audibly monitor shop door entries or storage areas while your system is disarmed. The chime mode feature is extremely useful for monitoring driveways and fire doors too. This fully automatic self testing unit allows you to forget the system is there, while knowing you are still protected. The business automation options allow you to use your existing wiring to control devices or lighting within your business premises. For apartments or difficult installations, a range of wireless sensors can be quickly and easily fitted to your system.

### Integrated Access Control

Access Control is no longer reserved only for larger more expensive systems. The Solution 64 incorporates proximity technology from Bosch, providing an affordable and effective solution for up to 10 readers in small commercial installations. Comprehensive access control features including Holidays, Date / Time and Day of the Week Schedules allow you to easily manage your employee access and arm/disarm functions of the security system.

### Multiple Arming Options

The versatility of the Solution 64 is captured in its ability to provide the right arming option for any business. You have the choice of arming and disarming using a PIN code, wireless remote, proximity card or token, or by using the Auto Arm function.

The flexibility of the Auto Arm Function enables you to program your system to automatically arm at pre-defined times. Programmed schedules can also extend to control the locking of gates or turning building lights on and off, providing a complete business solution.

### Easy Remote Arming

The Solution 64 can be programmed to use a wireless remote that easily fits onto your keyring. These small remote controls allow you to arm and disarm your business premises by simply pressing one button.

The wireless remote can also be used to set the system in STAY mode, act as a portable panic button, and can even be used to switch lights and open factory gates & doors.

# Burglaries can be very costly to your business
## Now thanks to Bosch, reliable protection needn't cost a fortune!

### Cost Effective Technology

State-of-the-art security technology has previously been unattainable for some due to prohibitive costs. Now, the Solution 64 eliminates this obstacle, thanks to its unrivalled price / performance ratio. The benefits begin with the installation stage itself, which is straightforward, inexpensive and, if you wish, wireless. Complex security installations are now a thing of the past.

### Flexibility

Solution 64 can be programmed to manage 64 zones that can be divided into 8 separately controlled areas. The 64 fully programmable intrusion zones can support sensors fitted to doors and windows, motion sensors and smoke detectors. When events are detected, the Solution 64 can sound sirens, transmit events to your monitoring service provider and activate lights, providing security you can rely on 24 hours a day.

### Protecting Your Assets

The Solution 64 provides the flexibility to divide your alarm system into a number of separately controllable areas including a common area (this can be reception, a kitchen or garages). It provides the flexibility for your staff to arm and disarm the areas that they have been given access to, without affecting other areas of your business.

For your convenience the Solution 64 can be configured to use a single code pad for all areas, or individual code pads for each area.

### Versatility

The Solution 64 offers you a wide choice of features and options, which coupled with the vast range of accessories available from Bosch Security Systems, ensures a system can be designed to suit your specific needs. Whether your office space is large or small, Bosch Security has a solution for you.
